

## HOW to disable 5Ghz on HG659 (DODO internet)

The router login information , user name and password is located on the back of the Huawei HG659 router

i) Logon to the **Huawei HG659 Web Interface** using your web browser

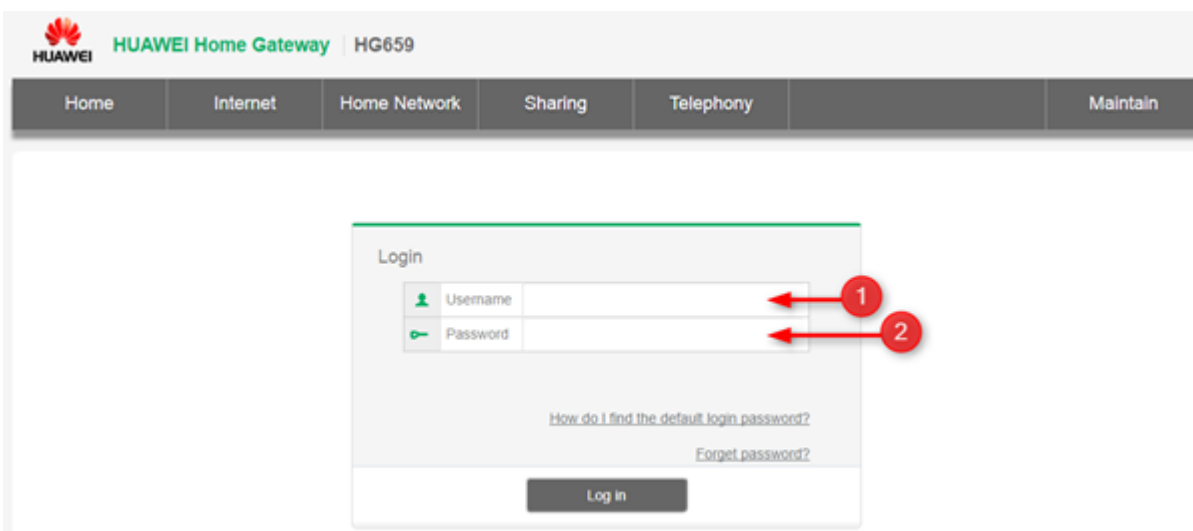

URL: <http://192.168.1.1>

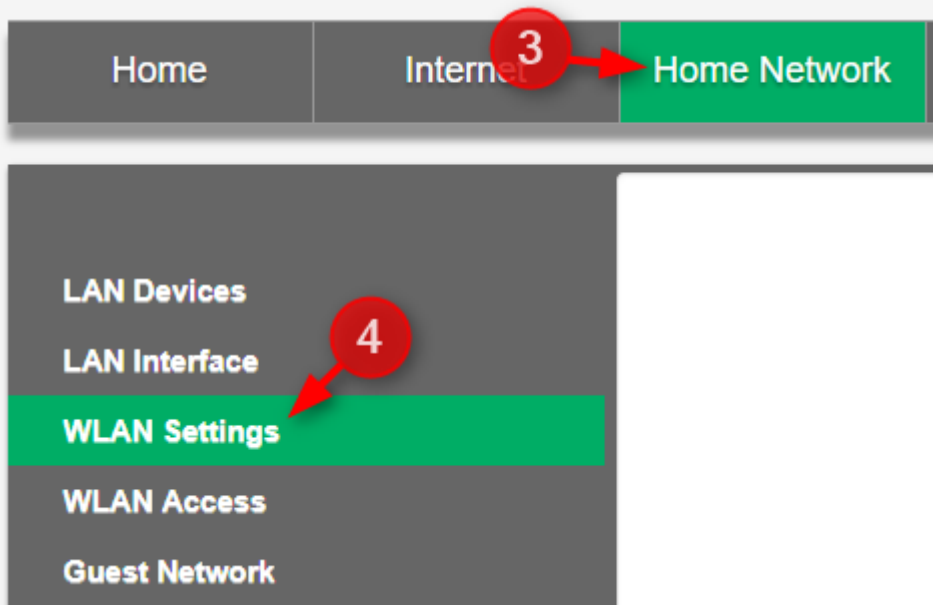

ii) Enter the administration username and password for your router to login

- Enter Username: (default is **!!Huawei**) **1**
- Enter Password: (default is **@HuaweiHgw**) **2**

**Or check the information on the router's rating label**

iii) From the top menu, click 'Home Network' **3** → then 'WLAN Settings' **4**

iv) The WiFi connection can be configured from this menu

### B) Enable or Disable WiFi

- **Enable WLAN 5 GHz:** Un-tick to enabled disable

#### WLAN Settings

Your smart phone or wireless-capable computer can access the Internet through WLAN.

#### Basic Settings

Enable WLAN 2.4 GHz:

Enable WLAN 5 GHz:

untick  
this then  
save

[What's this?](#)

Save

Save it, then reset your device and star the pairing process over again!
