Save the settings, then close the page

Go to your phone's Wi-Fi settings.

Select the Guest Wi-Fi signal and enter the wireless password you wrote down.

Now to commence the pairing method on your smart device,

Open the Mirabella genio app.

Ensure that the indicator light on your device is blinking.

In the screen where you are asked to enter the Wi-Fi name and password, Ensure the Wi-Fi name is Guest and use the wireless password you wrote down previously.

If the fast-blinking EZ method doesn't work, please try slow blinking AP method
